Virtualisation from the ground up

using virtual worlds to examine data

Virtualisation from the ground up

using virtual worlds to examine data

Big Data

- Mass Information
- Opaque data sets
- Core local knowledge lost

Reformat information

- Local knowledge, a city view
- Opening a view of time
- Interpreting behaviour

Visiting datasets

- Data as a destination
- Global access to Global knowledge
- Presenting problems as puzzles

DeSciencing Data

- Publishing datasets as locations
- Collaboration in shared spaces

Virtualising intelligence
Visiting information
